

WHEN THE **HORNET** CLEANS YOUR POOL, ALL YOU DO IS ENJOY THE SWIMMING.

- Simply plug in your 24v **HORNET** and press a button – No Hoses or Filter Connections needed. It's that easy!
- **HORNET** is self-contained with its own internal pump and filter system so it vacuums and filters independent of the pool's pump and filter.
- **HORNET** features the patented hydroscrubbing system to power wash sand, silt and grime out from seams and folds which other cleaners can't reach.
- **HORNET** is "Jet-propelled" and its patented turning system systematically cleans a 24' diameter pool in less than 1 hour.
- **HORNET** removes everything, with its easy to clean, 19-quart capacity, reusable filter bag.
- Actually pays for itself by reducing chemical, water and energy total costs by as much as 50%!
- Proven long life and virtually maintenance free, **HORNET** works without the familiar wear and tear parts found on every other cleaner, saving you even more money.
- **HORNET's** patented guidance system is easy to set and allows it to systematically clean any shape above ground pool.
- **HORNET's** extra-wide non-marring wheels allow it to roll over ripples and foot printed vinyl pool bottoms.
- Its Patented E-Z Swivel Device ensures a tangle-free cable.
- Made in the U.S.A. Supported by the leading national network of robotic service centers and in-house customer support team.

NO MATTER WHAT SHAPE ABOVEGROUND POOL YOU HAVE, THE **HORNET** IS READY TO CLEAN— JUST DROP IT IN AND PUSH A BUTTON!

Systematic Round Pool Cleaning Pattern

Systematic Rectangular Cleaning Pattern

Systematic Oval Cleaning Pattern

The **HORNET** is shipped to completely clean most vinyl lined round, rectangular and oval aboveground pools of any size and depth.

THE ROBOTIC SOLUTION TO AUTOMATICALLY CLEAN ANY ABOVEGROUND POOL FLOOR WITHOUT HOSES THE POOL FILTER or YOU!

Patented Power Washing Jets Cleans Where Other Cleaners Can Not Reach!

HORNET

THE ABOVEGROUND POOL CLEANING ROBOT

The easiest, fastest, and most efficient way to clean your pool.

You bought a swimming pool to have fun - not to give yourself more work. Maybe you find yourself spending time cleaning the pool instead of swimming and enjoying. Or maybe you bought one of those pool cleaners that work off your pool filtration system.

Because your aboveground pool filtration system was only designed to filter your pool water and not to vacuum and clean your pool floor, you may have noticed that the filtration system does not do a very good job and requires constant cleaning. Besides, those bulky hoses get tangled; you've got to drag them out of storage, hook them up to the intake valve, and the cleaners tend to get stuck on the ladders, stairs, seams, drains and footprints.

Get yourself a **HORNET** today and enjoy complete, effortless pool cleaning at the touch of a button!

Here's what makes the **HORNET** the best way to clean your aboveground pool:

Patented E-Z Swivel ensures a tangle-free cable.

The **HORNET** is "jet-propelled" by its own internal pump and automatically changes direction when it comes to the pool wall! (no drive belts to replace or hoses to untangle)

The internal pump motor pulls debris through large intakes on the underside of the **HORNET** into its internal, reusable micron filter bag capturing everything from large leaves to bacteria and algae as small as 2 microns.

HORNET body is lightweight and durable (only 10.5 lbs.).

Large, lightweight, non-marring wheels traverse pool's floors without getting stuck.

HydroScrubbing jets gently power wash deep into pool's seams and creases to flush dirt, sand, silt and algae up and directly into its large vacuum intake ports for fast, complete cleaning.

2" clearance allows the **HORNET** to pass over obstacles like raised drains, "footprints", and uneven pool floors.

Patented Systematic Directional Guidance Axle: A simple pin-in-axle setting enables the cleaner to operate in a systematic cleaning pattern in any shape pool. In as little as 1 hour the floors of even most large pools are hydroscrubbed, vacuumed and microfiltered clean in a thorough and efficient manner saving you time and money.

HORNET's floating cable and power supply are ETL listed to UL Standard 1081.

HORNET cleans most pools in less than an hour and has a 2 hour automatic shut-off.
